

# **ASSINGMENT: Computer Basics**

**Q1.What is Computer?**

**Ans.** Computer is a device which helps to compute the data in a simplified way to get improved information.

**Q2.What is RAM?**

**Ans.** RAM(Random-Access Memory); RAM is a storage device which helps to store temporary files to process.

**Q3. Where is data stored in a computer?**

**Ans.** In a computer, data is stored in two ways: permanent and temporary. For permanent storage, computers use HDD (Hybrid hard drive), SSD (Solid state drive), etc. For temporary storage, computers use RAM, ROM, etc.

**Q4. What is that input device used to type text and numbers on a document in the computer system?**

**Ans.** KEYBOARD

**Q5. What are the output devices?**

**Ans.** An output device is any peripheral that receives data from a computer, usually for display, projection, or physical reproduction. For example, the image shows an inkjet printer, an output device that makes a hard copy of anything shown on the monitor. Monitors and printers are two of the most commonly used output devices used with a computer.

**Q6.Which is the input device that allows a user to move the cursor or pointer on the screen?**

**Ans. MOUSE**

**Q7. Which language is directly understood by the computer without a transition program?**

**Ans. Binary language (0 & 1) Or you can say that machine language.**

**Q8. What are input devices?**

**Ans. Input Devices are the electronic parts of the Computer. The input devices of Computers are used to input the user's data or information into computers for the output results.**
